Docket No.: 27798-00101USPT

## **AMENDMENTS TO THE CLAIMS**

- 1. (Currently Amended) An erosion control blanket for controlling erosion and blending in with a surrounding area consisting essentially of comprising:
- a top sheet of a netting material having a color which tends to blend in with the surrounding area;
  - a bottom sheet of a netting material;
- a synthetic filler material being disposed between said top sheet and said bottom sheet; wherein said synthetic filler material comprises a plurality of crimped polymer fibers, said crimped polymer fibers being arranged to form a three-dimensional matrix;

wherein said synthetic filler material comprises a substantially post-consumer recycled polyester having a color which tends to blend in with the surrounding area.

## 2-3. (Canceled)

- A. (Previously Presented) The erosion control blanket of claim 1, wherein said substantially post-consumer recycled polyester comprises post-consumer recycled polyethylene terephthalate (PET).
- 3 S. (Previously Presented) The erosion control blanket of claim s, wherein said substantially post-consumer recycled polyethylene terephthalate (PET) comprises green soda bottle material.
- 6. (Original) The erosion control blanket of claim 1, wherein said synthetic filler material has a resistance to compression value of about 0.210 to about 0.285 psi/gram of fiber.
- (Previously Presented) The erosion control blanket of claim 1, wherein said synthetic filler material has a percent recovery value of at least about 90% following application of a 0.5 psi compressive load for a period of 5.0 minutes.
  - 8. (Canceled)

Application No.: 09/648906

Docket No.: 27798-00101USPT

(Previously Presented) The erosion control blanket of claim 1, wherein said crimped polymer fibers comprise additives to increase resistance to ultraviolet (UV) radiation.

10-18. (Canceled)
